

ERGOREST® Forearm support

ERGOREST® forearm support is ergonomically designed to provide a support for the forearm and to relieve muscle strain and tension from neck and shoulder area. **ERGOREST®** forearm support is specially designed for office and industrial use, such as data terminal and light factory assembling tasks. **ERGOREST®** forearm support is lightweight and easily movable. The support is made of aluminium alloy and polyamid, the pad is upholstered with genuine leather. The forearm support is attached to tabletop by adjustable clamps. It also has a height adjustment screw. Scientific studies revealed that **ERGOREST®** could significantly reduce muscular strain, blood circulation irregularity, numbness and pain. **ERGOREST®** also helps prevent users to develop bursitis, epicondylitis and the symptoms of Carpal Tunnel.
