

Large key keyboard [EK09274 , EK09275]

This new large print keyboard has been specifically designed for those with impaired vision. The large print and big keys make this keyboard much more user-friendly. The keyboard has extra large (1") keys and a standard QWERTY keyboard layout in upper case letters. It includes letters, numbers and the most commonly used function keys. Keys are 1" square and only require light pressure to activate. A numeric keypad is available separately if required.

Extra large (1") keys
