

Dual swivel mechanism [EINTM6050NP]

The dual swivel mechanism allows additional tray adjustment, 90 degree travel range to the front of the arm, in addition to the 360 degree swivel of the rear arm. That increases the range of motion of the mechanism. This allows more ergonomic positioning for corner unit or off-center installation.

FEATURES :

- All steel support arm construction.
- Lift n' lock height adjustment.
- Stores away below work surface when not in use.
- Scratch resistant black sand tex finish.
- +/- 15 degree tilt adjustment with 360 degree swivel.
- 90° front swivel (45° left/45° right).
- 23" track Teflon glide.
- Meets ANSI/BIFMA ratings.
- Can be used with all our keyboard platforms.
