

Portable Laptop Station [ELAPTOP]

The use of a laptop can be an ergonomic nightmare and create several unique ergonomic challenges when it comes to user comfort and safety. The Portable Laptop Station is designed for the highly mobile laptop user and offers essential ergonomic flexibility to use laptop computers comfortably. Used alone, or with other ergonomic accessories, reduces risk of repetitive strain injuries, and improves posture and user comfort. It can be used in an office environment or on the road. The Portable Laptop Station is strong enough to support a laptop with docking station.

Laptop keyboard becomes a document holder when used with a secondary keyboard.

Elevates laptop screen for improved head and shoulder posture.
