

**The 9400 Point-of-Care Arm maximizes the flexibility of space-challenged healthcare environments. This huge arm extends almost six feet, enabling it to be mounted behind a bed while still extending far enough for patient or caregiver use. The dual arms fold upwards, minimizing the consumption of valuable horizontal space. Special features include completely internal cable management, durable, heavy-duty construction, and remarkably smooth motion. Available with counter-top mount (E9400CM) or wall-mounted version (E9400WM). Both with internal cable management. The 9400 Point-of-Care Arm is an ideal solution for patient rooms, clinics, dental offices... anywhere a monitor is needed.**

- Maximum extension of 68"/1.72m.
- Supports monitors up to 18l/8.16Kg.
- Rotate monitor up to 340 degrees
- Dual arms enable effortless positioning of monitor
- Arms fold upward for minimal space consumption
- Internal cable management
- Optional rotational stop available
- VESA-monitor compatible - 75mm & 100mm VESA adapters included.
- Weight Range  
Supports monitors from 4-18lbs/1.81 to 8.16Kg.
- Model number : E9400CM (counter mount)  
E9400WM (wall mount)
